Summary

Software engineer with expertise in Java development, API integration, and database design. Demonstrated success in troubleshooting software defects and implementing thorough test plans, resulting in high-quality deliverables. Strong analytical skills and a commitment to continuous improvement in software performance.

Skills

- Java development and API integration
- Database design and MySQL
- Software testing and quality assurance
- Technical documentation and requirements analysis
- Agile methodologies and problem solving
- Mobile app development and web technologies
- Software design and architecture
- UI/UX design and user experience
- Windows operating systems and JSP

Experience

Software Engineer, 07/22 - 07/24
Intellect Design Arena Limited, Mumbai

- Troubleshoot and resolve software defects during testing phases to ensure quality delivery.
- Developed, tested, and documented software applications using Java, JavaScript, HTML, and CSS.

- Designed databases to efficiently store application data using SQL Server or MongoDB.
- Executed comprehensive test plans to identify software vulnerabilities and bugs effectively.
- Integrated third-party APIs to enhance functionality and interoperability of applications.
- Wrote technical documentation for software applications and system processes for future reference.
- Implemented code reviews to ensure adherence to best practices and maintain high-quality standards.
- Participated in daily stand-ups to address progress and obstacles with team members.

_ _

Junior Android Developer, 11/2020 - 12/2021
Korawan India IT Solution
- Developed user-friendly Android applications using Java and Kotlin programming languages.
- Collaborated with designers to create engaging app interfaces and improve user experience.
- Conducted code reviews to ensure adherence to best practices and coding standards.
- Integrated third-party APIs for enhanced functionality and streamlined data access.
- Tested applications on multiple devices to identify and fix bugs effectively.
- Assisted in troubleshooting issues reported by users to enhance app performance.
- Performed unit testing on all developed components of the application to ensure quality assurance standards were met.
- Integrated third-party APIs into the application where necessary to enhance user experience.
- Developed Android applications using Java, XML and Android SDKs.

- Assisted with creating documentation for software projects, including user manuals and release notes.
- Analyzed user requirements and designed solutions accordingly.
- Participated in sprint planning activities to define tasks for upcoming releases.
- Created UI and UX designs for Android applications, including layout design and graphic assets.
- Analyzed customer feedback from Google Play Store reviews and worked towards improving user satisfaction ratings.
- Participated in the lifecycle of Android application research and planning through app launch and client support.
- Provided estimates on development cycles and worked within project timelines.
- Collaborated with the UI/UX team to create compelling device-specific user interfaces and experiences.
- Translated designs and wireframes into high-quality code.
- Analyzed code and corrected errors to optimize output.
- Integrated object-oriented design and development techniques into projects to support usability goals.
- Employed integrated development environments (IDEs).
- Recommended strategies to maximize performance and lifespan of equipment involved in software installations.

_ _

Business Associate, Feb 2018 - Nov 2018
Tata Consultancy Services
- Collaborated with teams to improve business

- processes and workflows.
- Analyzed market trends to support strategic decision-making.
- Developed presentations for stakeholders to convey project updates effectively.
- Assisted in implementing new software solutions for operational efficiency.
- Performed administrative duties such as filing, data entry.
- Conducted market research to identify potential customers and industry trends.
- Suggested improvements to increase efficiency and profitability by reducing waste.
- Improved new business acquisitions by creating dynamic sales presentations.
- Analyzed sales data to determine areas of improvement or growth opportunities.
- Assisted in development of automated reporting system to improve data accuracy.
- Negotiated contracts with vendors and suppliers to secure favorable terms.
- Analyzed company's expenditures and developed financial models.

EDUCATION AND TRAINING

K.C College of Engineering And IT, Nawanshar, Punjab ,04/2017

B.TECH : Computer Science
- Ranked in Top 10% of class
- Participated in the (Skit "Say No To Drugs" Role script , play , and direct).
- Workshop on ANDROID from IMAX Technology duration 5 days.
- CORE JAVA Training from DK UNICARE duration 45 days in college campus.
- Core Java and Advanced Industrial Training from DUCAT NOIDA duration 4 months.
- INFOEDGE COURSE (ADCA) Training from NIIT

- Member of the (K.C Warriors and KCPIENS)
- Completed online course on (Udemy)
- Host the Event as an Anchor on MOTHER'S DAY.
- Best Appreciation and Quiz Winner in B.Tech block K.C.E.I.T.

LANGUAGES

English :
Intermediate(**B1**) Hindi
: Proficient(**C2**) Punjabi
: Elementary (**A2**)
Marathi : Elementary
(**A2**)

Certifications And Licenses

Java projects using JSP, Servlet, Spring, and Spring Boot.

Worked on Android Apps like Secure
Accounting,LaraWater,4MedApp,VivahAsthal,E-Septi

Infoedge Course AT **NIIT.**
